Art Unit: 1754

It is noted that claim 9, lines 6-7 are ungrammatical. It appears that "amount" in line 6 was intended to be – amounts – and in line 7, that – contain an insubstantial amount of nickel values – was intended.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3,4,7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kelland '478 or Ergun '310 each in view of the Grant & Hackh's reference.

Kelland and Ergun each suggest the instantly claimed process of exposing a mixture of particles to microwave energy to heat the particles and then exposing the particles to a magnetic separation process. See claims 8-15 of Kelland; and cols. 2,3 and the claims of Ergun. The taught microwave energy suggests the instantly claimed millimeter wave energy since microwave energy includes a wavelength of 1 mm, ie. millimeter wave energy, (see pg. 371 of the Grant & Hackh's reference). It is noted that the instantly claimed "millimeter wave energy" is not limited to a frequency range of 30-500 GHz as applicant appears to be arguing. The instantly claimed "millimeter wave energy" includes any wave energy that has a millimeter wavelength. Microwave energy has a wavelength of 1 millimeter.

Claims 9-15,24-27 appear allowable over the cited prior art of record none of which teaches or suggests the instantly claimed combination of process steps.

Applicant's arguments filed November 1, 2004 have been fully considered but they are not persuasive. Applicant's arguments have been responded to in the body of the rejection above.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
